PROFESSIONAL SUMMARY

Results-driven MERN Stack Developer with hands-on experience in building scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in REST API design, JWT authentication, Redux, Socket.io, Git, Agile workflows, and deployment using Vercel and Render. Strong in JavaScript, SQL, debugging, and modern web development.

EDUCATION

Anurag University

Bachelor of Technology in Computer Science (CGPA: 8.03)

Hyderabad, Telangana

Nov. 2020 – July 2024

TECHNICAL SKILLS

Languages: JavaScript, SQL, TypeScript, HTML/CSS

Frontend: React.js, Redux, Tailwind CSS, Bootstrap, DaisyUI

Backend: Node.js, Express.js, REST APIs, Redis, JWT Authentication

Tools: Git, GitHub, Postman, Vercel/Render, Agile/Scrum.

Databases: MongoDB, MySQL

Other: Socket.io, MVC Architecture, Responsive Design, API Integration

EXPERIENCE

MERN Stack Developer Intern

Arah Infotech

April 2026 – Present

Hyderabad, Telangana

- Developed and maintained a multi-tenant HRMS platform using the MERN stack, automating attendance, leave, payroll, and employee management workflows across multiple organizations.
- Engineered 25+ RESTful APIs and implemented JWT, Redis sessions, Face ID, and WebAuthn authentication, improving application security and session reliability by 35%.
- Built real-time attendance tracking, notifications, and employee activity monitoring using Socket.IO, reducing administrative effort by 40% and enhancing operational visibility.
- Optimized MongoDB queries, caching mechanisms, and frontend performance, reducing API response times by 30% while improving scalability and user experience.

PROJECTS

Student-Management ([GitHub](#)) ([Link](#))

- Developed a full-stack Student Management System (MERN stack) with React 19, Vite, and Tailwind, delivering a responsive UI.
- Built a feature-rich admin dashboard with fee management, faculty modules, and real-time analytics (Recharts), reducing manual operations by 50%.
- Implemented secure RBAC authentication using JWT & Firebase, ensuring 100% protected role-based access for admins, faculty, and students.
- Integrated Cloudinary and XLSX-based workflows, enabling scalable media handling and bulk data export, cutting reporting time by 60%.

E-Commerce ([GitHub](#)) ([Link](#))

- Built a complete full-stack e-commerce application using MongoDB, Express.js, React.js, and Node.js.
- Implemented secure JWT authentication and bcrypt password hashing with role-based access for users/admins.
- Developed admin dashboard with real-time CRUD operations for products, inventory, and users.
- Added product search, filtering, cart management, and checkout workflow.
- Designed responsive UI using Tailwind CSS for mobile and desktop devices.

FateChat ([GitHub](#)) ([Link](#))

- Built scalable real-time chat platform using MERN Stack with Vite.
- Integrated Socket.io for low-latency instant messaging and live communication.
- Managed global state using Redux and implemented JWT authentication and secure user sessions.
- Used Cloudinary for cloud media storage and image management.
